

OLUWATOBI OLATIDOYE

DevOps Engineer

tobianita4@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#) | Calgary, Canada (UTC-6)

DevOps engineer who builds the path from a code commit to a running, health-verified deployment. Containerized a multi-tenant app with Docker and deployed it to Google Cloud Run, and built a declarative Jenkins pipeline that automates build, deploy, and verify and halts before broken changes ship. About a year of hands-on work in pipelines, containerization, and cloud deployment, moving into DevOps from an engineering background.

SKILLS

CI/CD & Automation: Jenkins (Pipeline-as-Code), GitHub Actions, Docker Compose

Containers & Orchestration: Docker, Kubernetes (manifests, local clusters via minikube/kind), Docker Compose, Google Cloud Run

Reliability & Config: Health-gated startup, Docker health checks, restart policies, structured logging, secrets and environment management

Data & Backend: PostgreSQL, Supabase (Auth, Storage, Row-Level Security)

Languages & Scripting: Python, Bash, TypeScript, JavaScript, YAML

AI Engineering: Anthropic Claude API, Gemini API, multi-model routing, Cursor, Claude Code

Cloud & Learning: DigitalOcean, Vercel, Linux, Ubuntu; learning Terraform and Prometheus/Grafana

Version Control & PM: Git, GitHub, Linear

PROJECTS

Reeto • Multi-tenant AI Content Platform (solo build, in development)

2026

Docker, Google Cloud Run, Supabase, Stripe, Next.js, GitHub Actions

- Containerized a deterministic render pipeline (Playwright and ffmpeg) with Docker and deployed it to Google Cloud Run in a dev environment, producing pixel-locked image and video assets on demand at near-zero marginal cost.
- Built a multi-tenant backend on Supabase with Postgres row-level security that isolates each tenant's data at the database layer, so one tenant cannot read another's records even if application code fails.
- Set up solo-developer engineering guardrails: branch protection, a PR-only workflow, GitHub Actions CI, AI-assisted code review, and environment-based secrets separation.
- Integrated Stripe in test mode with webhook signature verification and idempotency keys, closing off duplicate charges and forged billing events under retries.
- Built a multi-model AI architecture that routes the Gemini API for research and structured JSON generation and the Anthropic Claude API for copy generation, matching each model to the task it handles best.

URL Shortener with CI/CD (Titsly)

2025 – Present

Jenkins, Docker, Docker Compose, PostgreSQL, Flask

- Built a declarative Jenkins pipeline with checkout, build, deploy, and verify stages that automates the path from a commit to a running, health-verified container and halts on any stage failure, so broken changes are caught before deploy.
- Containerized a Python/Flask app and PostgreSQL database with Docker Compose, adding health checks and health-gated startup so the app waits for confirmed database readiness before booting, removing a class of race-condition startup failures.
- Added container-level self-healing with Docker restart policies for automatic recovery from crashes without manual intervention.

DevOps Portfolio Site

2025 – Present

MkDocs Material, Markdown

- Built a technical portfolio with MkDocs Material documenting CI/CD pipeline architecture, Docker Compose configuration, and container health monitoring as written engineering case studies.

EXPERIENCE

Leecon Associates • Lagos, Nigeria

Aug 2023 – Jan 2025

Civil Engineer

- Worked as a civil engineer on client projects, coordinating technical requirements and timelines to keep deliverables on schedule.

CERTIFICATIONS

Google IT Support Professional Certificate

2024

Kubernetes & Cloud Native Associate (KCNA), Linux Foundation

In progress

VOLUNTEER EXPERIENCE

Liberal Model Schools • Ogun, Nigeria

2017 – 2025

Mathematics & Science Teacher (holiday volunteer)

- Taught mathematics and science during school holidays at an understaffed secondary school, and spoke at its career day to build interest in STEM.

EDUCATION

BEng, Civil Engineering • Federal University of Agriculture, Abeokuta

2023
